PREFACE.

In the year 1923 a big hoard of the copper coins of Gujarat sultans was found from a hill near Marole, a village to the north-east of Andheri Station of the B.B. & C.I. Railway, Thana District. About a hundred coins, mostly of unknown types, were selected for this museum, about 345 coins were distributed to other museums, and the rest returned to the Victoria and Albert Museum, Bombay.

Seven years after this, the picked collection of the late Dr. G. P. Taylor, consisting of 179 silver and 459 copper coins, was purchased from Mr. S. M. Contractor of Bombay. Again in 1932 Professor S. H. Hodivala, M.A., offered his whole collection of coins to the museum, including 137 silver and 874 copper coins of the Gujarat sultans. The Trustees availed themselves of this opportunity of enriching their collection of these coins, and it is but natural that Mr. A. Master, I.C.S., C.I.E., the President of the Numismatic Society of India, advised them, in his presidential address for the year 1932, to undertake the publication of a catalogue of these coins. The examination and registration of the coins in these collections gave Mr. Singhal, my Gallery Assistant, an opportunity to specialise and qualify himself as the proper man to compile this catalogue. From the total number of about 500 silver and 2,000 copper coins about 1,000 typical coins are incorporated in this catalogue and about 150 selected ones are illustrated in the plates. It is rather unfortunate that, though about 20 gold coins of this dynasty are known, this museum has secured only one specimen so far.

With a view, however, to make the catalogue as exhaustive and representative as possible, members of the Numismatic Society of India and various collectors and museums—both in and out of India—were requested to favour us with a list of such of their Gujarat sultan coins as have not been catalogued so far. With the help of several replies, lists, and photographs received in response to our appeal it was possible to include in this catalogue the description of such additional coins as are not in our cabinet. These coins are described in chronological order, and bear the additional letters a, b, c, etc. along with the serial numbers. We take this opportunity of expressing our heart-felt thanks to all those who have extended their healthy co-operation to us in this work.

The first serious attempt at describing these coins was made by Dr. G. P. Taylor in 1902 in his scholarly paper printed in the *Journal of the Bombay Branch of the Royal Asiatic Society*. In 1907 Mr. H. N. Wright described coins of this dynasty in his volume II of *The Indian Museum Coins*. During the course of these thirty years several new types have come to light. In 1926 Professor S. H. Hodivala published his paper on some unpublished coins in the *Bombay Asiatic Society's Journal*, New Series, volume II. In compiling this catalogue, these publications, as well as other stray lists and notes written on several coins by Messrs. Edward Thomas, Lane-Poole, E. Oliver, A. Master, C. R. Singhal, A. Botham, and K. N. Dikshit were consulted, and we thank them heartily for the help we received from their publications.

G. V. ACHARYA,
Curator.

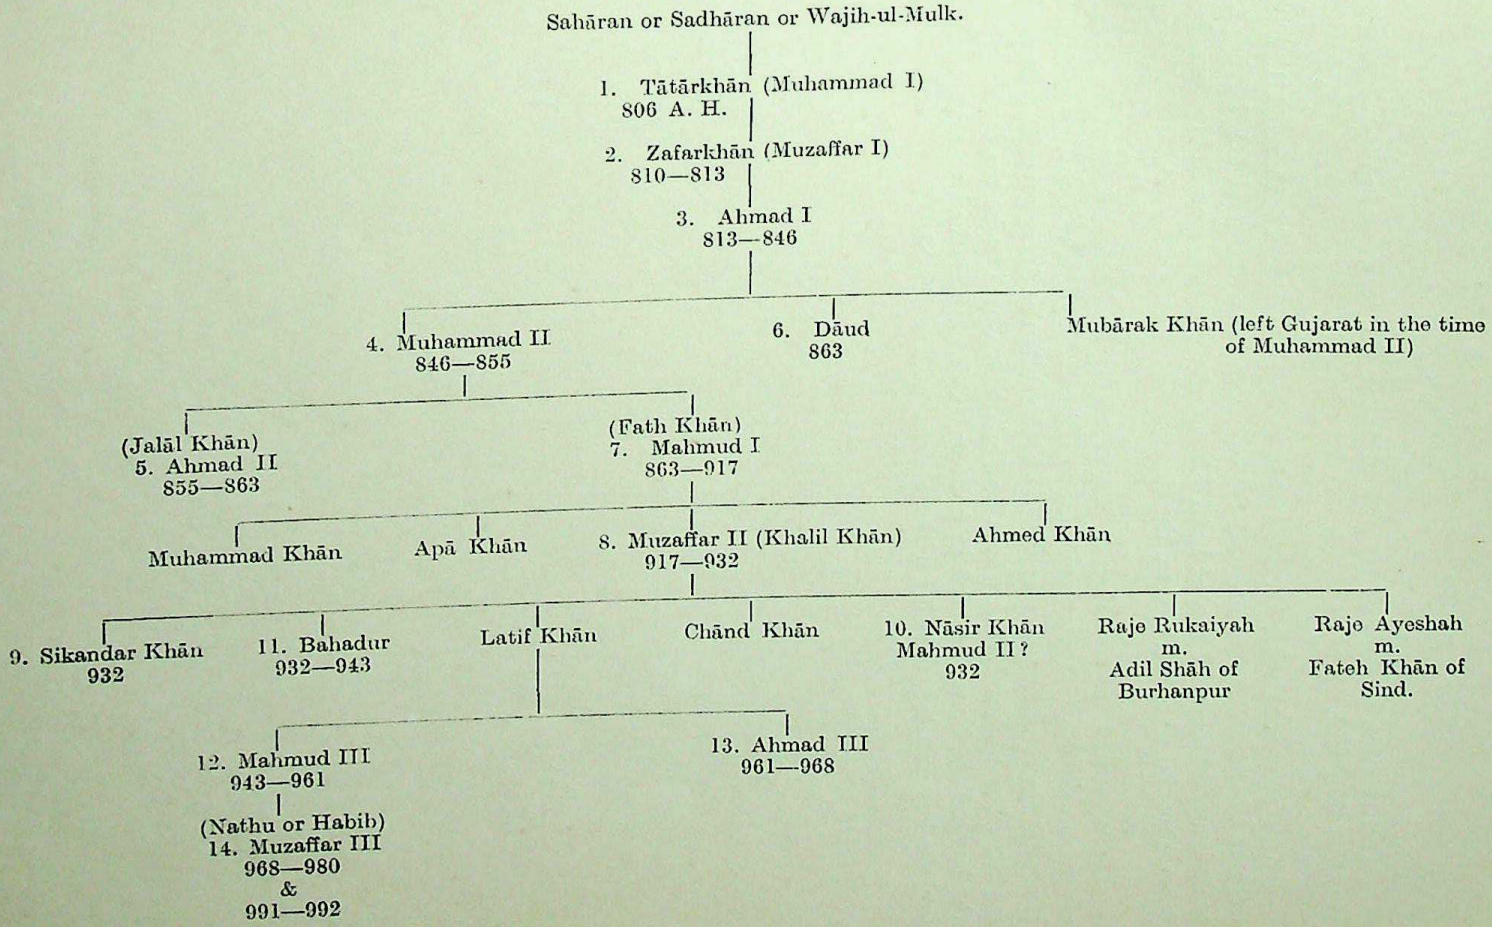
GENEALOGICAL TABLE OF THE KINGS OF THE GUJARAT SALTANAT.



NOTES.

THE relation of Ahmad III and Muzaffar III, as given in the following table, is rather doubtful.

The coins of Ahmad III show that he was the son of Mahmud III, while the authors of *Mirat-i-Sikandari* and *Ahmadi* say that, Mahmud III, having left no male issue, Ahmed III, son of Latif Khan, who was only a small boy, was brought from Ahmedabad and seated on the throne.

As regards the parentage of Muzaffar III, Ferishta and Abul Fazal and the author of *Mirat-i-Ahmadi* relate that, as Etimad Khan, who was all powerful at the time, did not consider any near relative of the sultan as fit for governing, he produced a young boy named Nathu whom he declared on oath to be the legitimate son of the late sultan, born and bred in secrecy. Other nobles had to accept his story, and the boy was declared king with the name of Muzaffar Shah.

CHRONOLOGICAL LIST OF THE KINGS OF THE GUJARAT SULTANAT.

No.	Name of King.	Year of Birth.	Reign.
1	Muhammad I	..	A.H. 806 (A.D. 1403).
2	Muzaffar I	A.H. 743 (A.D. 1342) ..	A.H. 810-813 (A.D.1407-1410).
3	Ahmad I	A.H. 793 (A.D. 1391) ..	A.H. 813-846 (A.D. 1410-1442).
4	Muhammad II ..	..	A.H. 846-855 (A.D. 1442-1451).
5	Qutb-ud-din Ahmad II	*Circ.* A.H. 805 (A.D.1402)	A.H. 855-863 (A.D. 1451-1458).
6	Daud	..	A.H. 863 (A.D. 1458).
7	Mahmud I	A.H. 849 (A.D. 1445) ..	A.H. 863-917 (A.D. 1459-1511).
8	Muzaffar II	A.H. 880 (A.D. 1475) ..	A.H. 917-932. (A.D. 1511-1525).
9	Sikandar	..	A.H. 932 (A.D. 1525).
10	Mahmud II	*Circ.* A.H. 926 (A.D. 1519)	A.H. 932 (A.D. 1525).
11	Bahadur	A.H. 912 (A.D. 1506) ..	A.H. 932-943 (A.D. 1526-1536).
12	Mahmud III	A.H. 932 (A.D. 1525) ..	A.H. 943-961) (A.D. 1536-1553).
13	Ahmad III	..	A.H. 961-968) (A.D. 1553-1560).
14	Muzaffar III	..	A.H. 968-980 (A.D. 1560-1573) and A.H. 991-992 (A.D. 1583-1584).

Notes :—

1. The dates in the foregoing list have been entered after weighing all the available information, but absolute correctness is difficult to obtain because the authorities themselves differ in so many places.

The following are the important discrepancies :—

(*a*) According to Ferishta, Muzaffar I died in 814, but the detailed account in *Mirat-i-Sikandari* of the death of Muzaffar I in 813 being poisoned by his grandson, Ahmad I, disproves the statement of Farishta.

(*b*) According to *Mirat-i-Sikandari* and *Ahmadi*, Ahmad I is considered to have died in 845. The copper coins of this sultan in the museum collection bear the last date A.H. 846. This corroborates the statement in *Tabaqat-i-Akbari* that Ahmad's successor, Muhammad II, ascended, the throne on " 3rd Rabi-al-Akhar, 846."

NOTES.

THE relation of Ahmad III and Muzaffar III, as given in the following table, is rather doubtful.

The coins of Ahmad III show that he was the son of Mahmud III, while the authors of *Mirat-i-Sikandari* and *Ahmadi* say that, Mahmud III, having left no male issue, Ahmed III, son of Latif Khan, who was only a small boy, was brought from Ahmedabad and seated on the throne.

As regards the parentage of Muzaffar III, Ferishta and Abul Fazal and the author of *Mirat-i-Ahmadi* relate that, as Etimad Khan, who was all powerful at the time, did not consider any near relative of the sultan as fit for governing, he produced a young boy named Nathu whom he declared on oath to be the legitimate son of the late sultan, born and bred in secrecy. Other nobles had to accept his story, and the boy was declared king with the name of Muzaffar Shah.

CHRONOLOGICAL LIST OF THE KINGS OF THE GUJARAT SULTANAT.

8	Muzaffar II	A.H. 880 (A.D. 1475) ..	A.H. 917-932. (A.D. 1511-1525).
9	Sikandar	..	A.H. 932 (A.D. 1525).
10	Mahmud II	*Circ.* A.H. 926 (A.D. 1519)	A.H. 932 (A.D. 1525).
11	Bahadur	A.H. 912 (A.D. 1506) ..	A.H. 932-943 (A.D. 1526-1536).
12	Mahmud III	A.H. 932 (A.D. 1525) ..	A.H. 943-961) (A.D. 1536-1553).
13	Ahmad III	..	A.H. 961-968) (A.D. 1553-1560).
14	Muzaffar III	..	A.H. 968-980 (A.D. 1560-1573) and A.H. 991-992 (A.D. 1583-1584).

Notes :—

1. The dates in the foregoing list have been entered after weighing all the available information, but absolute correctness is difficult to obtain because the authorities themselves differ in so many places.

The following are the important discrepancies :—

(*a*) According to Ferishta, Muzaffar I died in 814, but the detailed account in *Mirat-i-Sikandari* of the death of Muzaffar I in 813 being poisoned by his grandson, Ahmad I, disproves the statement of Farishta.

(*b*) According to *Mirat-i-Sikandari* and *Ahmadi*, Ahmad I is considered to have died in 845. The copper coins of this sultan in the museum collection bear the last date A.H. 846. This corroborates the statement in *Tabaqat-i-Akbari* that Ahmad's successor, Muhammad II, ascended, the throne on " 3rd Rabi-al-Akhar, 846."

(*c*) Ferishta describes Ahmad II as born in 855, and as ascending the throne in the 49th year of his age; but, according to other histories, he is taken to have ascended the throne in A.H. 855.

(*d*) According to *Mirat-i-Sikandari* and *Ahmadi*, Muzaffar II was born in 880, and ascended the throne in 917 in the 27th year of his age; but Farishta says that he was born in 875 and came to the throne in the 41st year of his age. If the year of birth of the former authorities is to be admitted, he ought to have ascended the throne in the 37th year of his age, and not in the 27th. If he was born in 875, the statement of Ferishta about the date of accession seems to be correct.

(*e*) According to *Mirat-i-Sikandri* and *Ahmadi*, Mahmud III ascended the throne in 943; but, according to *Ferishta* and *Tabaqat-Akbari*, in 944. The earliest coin in the collection bears the date 944. The correct time therefore may probably be the end of A.H. 943.

(*f*) According to *Mirat-i-Sikandari* and *Ahmadi*, Ahmad III died in 968; but, according to *Ferishta*, he died in A.H. 969. The coins of Muzaffar III, the successor of Ahmad III, dated 968 are known, which substantiate the former statements.

2. The coins of all the eleven sultans out of fourteen, *i.e.*, excepting those of Muhammad I, Daud, and Sikandar, are included in this catalogue. As these three sultans were on the throne for a very short period, and as they were either deposed or murdered before they could establish themselves, it is not possible to get their coins.

3. (*a*) Four dateless copper coins issued in the name of Nasir Shah are attributed to Mahmud II, whose original name was Nasir Khan. They are undoubtedly of Gujarat fabric.

(*b*) *Ferishta's* reference to coins issued in the name of Muhammad Shah Farooky, nephew of Bahadur Shah, is not so reliable. Both *Mirat-i-Sikandari* and *Ahmadi* say with one voice that, as soon as Muhammad Shah heard the sad news of his uncle Bahadur's death, he was so much grieved that he stopped talking to anybody and resigned his life a few days after the death of Sultan Bahadur.

(*c*) In the *British Museum Catalogue of Coins of Muhammadan States* three copper coins, Nos. 437, 438, and 439, are doubtfully assigned to Muhammad Shah, the Pretender. But now it is admitted that these coins were really struck by Kadir Shah (Mahmud III of Gujarat) of Malwa, vide article by Mr. H. N. Wright in *Numismatic Chronicle*, volume XII, 1932, page 31.

INTRODUCTION.

GENERAL.

A CRITICAL study of the history of India shows that there has always been a succession of rise and fall of the central power, with consequent changes, in the inverse order, in the positions of the provincial rulers. Whenever the emperor at Delhi was a powerful monarch, he reduced all the rulers in different parts of India to mere feudal kings, or independently appointed governors of his own choice and had a guiding hand in the administration of the various provinces in accordance with his own policy. But, as soon as the ruler happened to be a weakling and the power at the centre waned, or when the trusted nobles and courtiers conspired against the emperor, the provincial governors naturally took advantage of the slackness of supervision and seized the reins of administration in their own hands.

After the all-powerful rule of Alla-ud-din Khilji and the predominating power of Muhammad Tughlaq, succeeded by the able administration of Firoze, there was a reaction once more. The later Tughlaqs, the Sayyids, and the Lodis had none of the talents and governing abilities of their predecessors who carved out the Muhammadan empire in India. Naturally it gave an opportunity to the provincial governors to declare their independence and get out of the control of the so-called Delhi emperors, who were by now mere puppets in the hands of intriguing nobles and selfish and ambitious courtiers. Taimur's attack in 1398 was a death-blow to the imperial power of the rulers at Delhi.

All these factors led to complete anarchy at the centre and the establishment and consolidation of independent kingdoms in various parts of India, such as Kashmir, Bengal, Malwa, Jaunpur, Khandesh, Gujarat, Gulbarga, etc. All those sultans issued their own coins for about two to three centuries until their kingdoms were once more absorbed in the Mughal empire under Akbar and his successors. Thus, from the numismatic point of view, the history of various provinces and the study of their coinage form a very vast subject for research. A good deal of spade work is already done by pioneer numismatists in almost all the branches of this period. But, as we go deeper and investigate, we find that there is still so much to be done in each of them. We have therefore taken upon ourselves to bring to light a large number of new types of coins of the sultans of Gujarat unnoticed and unpublished hitherto. Fortunately the cabinet of this museum has a very rich collection to afford us with greater facility to issue a publication exclusively of coins of this dynasty of Gujarat.

Should the scholars of every province or the authorities of the various provincial museums be able to concentrate upon the collection of coins of local interest and issue exclusive publications of this nature, a flood of light will be thrown on the vast field of numismatics that still stands unexplored before us.

HISTORICAL OUTLINE.

It is neither necessary nor appropriate for the purposes of introducing the subject-matter of this catalogue to our readers to narrate a detailed history of the sultans of Gujarat in these pages. What we are concerned with is only an outline of the history of those rulers with special reference to coins. It is therefore proposed to deal with only such of the incidents, circumstances, and historical events during the regimes of those sultans as are essential for following the growth, development, and decay of the coinage of the dynasty. Those who are interested in details may refer to historical works such as (1) *Tarikh-i-Ferishta*, by Muhammad Qasim, surnamed *Ferishta;* (2) *Mirat-i-Sikandari*, by Sikandar bin Muhammad; (3) *Mirat-i-Ahmadi*, by Ali Muhammad Khan; and (4) the *Bombay Gazetteer*, vol. I, part I, by Colonel J. W. Watson.

In the year A.D. 1391, during the reign of Nasir-al-din Muhammad Shah IV Tughlaq on the throne of Delhi as emperor of India, Zafar Khan, one of his nobles and a distant relative, was appointed viceroy of Gujarat and sent to chastise Farhut-al-Mulk Rasti Khan, who had rebelled with the idea of becoming independent of the paramount power at Delhi. At Kambhu, in the district of Anhilwad Pattan, Rasti Khan was defeated and slain and Zafar Khan founded on the site of the battle the town of Jitpur.

At Delhi Muhammad IV died in 1392; and, as his son Sikandar, also, met the same fate after hardly ruling for a month and a half, his second son, Nasir-ud-din Mahmud II, was proclaimed emperor. Some of the nobles wanted Sikandar's son to succeed his father. In the midst of this unsettled state of affairs Taimur invaded India in the year A.D. 1398, and towns through which he passed, and Delhi, the capital, were subjected to horrible massacre and plunder. Mahmud II fled for safety, and, after some wandering, ultimately approached Zafar Khan at the gates of Pattan. But, as Zafar Khan did not help him to march to Delhi, he got disgusted and went to Malwa. There he heard about Nusrat being turned out by his vazir, Iqbal Khan, and he therefore returned to Delhi in A.D. 1402. It was a difficult task for him to keep in control the various provincial governors who, taking advantage of his incapacity, started carving out independent kingdoms for themselves.

Tatar Khan was detained at Delhi when Zafar Khan was sent to Gujarat, but in the confusion that followed the death of Sultan Muhammad IV he escaped from Delhi and conspired for the imperial throne. Having failed in his attempts, he fled to Gujarat with the idea of getting support from his father, who was too shrewd to be involved in that fruitless attempt.

Tatar Khan, however, became restive and, having imprisoned his father, ascended the throne with the title Nasir-ud-duniya wa-ud-din Muhammad Shah.

Zafar secretly sought the help of his brother, Shams Khan, who poisoned the hot-headed Tatar while he was on his way to conquer Delhi. Zafar Khan got back his liberty and the governorship. Full of remorse, he was loath to continue, and

declared Ahmad Khan, his grandson, as his successor. He, however, could not wait till the natural death of his grandfather, and, under the pretext of punishing him for the murder of his father, forced him to drink a cup of poison.

After the death of his grandfather Ahmad ascended the throne with the title of Nasir-ud-duniya wa-ud-din Abul-fath Ahmad Shah. He became the virtual founder of the dynasty, and during the course of 33 years' rule (A.H.) 813-846 extended his power far and wide by leading expeditions against Junagadh, Champaner, Idar, and Malwa.

Ahmad, in the year A.H. 813, began to build on the banks of the Sabarmati near the village named Asawal, the present city of Ahmedabad, and styled it Shahr-i-Mu'azzam—the great city. He added to the beauty of the city by erecting several public buildings which are even to-day considered as among the best specimens of Gujarat architecture. With the idea of keeping in check the Chief of Idar, who, when attacked, was retiring into the hills near by, Ahmad built the fort which he styled Ahmadnagar about eighteen miles south-west of Idar and on the banks of the Hathimati river. The date of building this city can be ascertained to be A.H. 829 on the strength of a coin of that date from this mint.

Muhammad II (*A.H. 846-855*). Muhammad Shah II succeeded his father, who died in 846. He was weak and merciful to a fault, and the period of his rule, extending over nine years is, more or less, uneventful. When Mahmud Khalji of Malwa invaded Gujarat with a large army, he, instead of fighting, took to flight like a coward. Naturally, the officers got disgusted with him and had him poisoned through one of his own relatives.

Ahmad Shah II (*A.H. 855-863*).—Jalal Khan, his son and successor, ascended the throne with the title of Qutb-ud-duniya wa-ud-din ("The Polestar of the World and of the Faith") Ahmad Shah. He met Mahmud Khalji at Kapadvanja and gave him a crushing defeat. He also made several unsuccessful attempts at capturing Chitor; and ultimately, when he led an expedition accompanied by the Sultan of Malwa, the Rana promised to pay the tribute. It is doubtful whether he died from a sword wound or from the effect of poison administered by his queen.

Daud Shah.—Qutb-ud-din was succeeded by his uncle, Daud Shah. On ascending the throne, however, he, by giving a high office to a low-born man and by other foolish acts, lost the confidence of his nobles, who dethroned him and placed Mahmud Shah, son of Ahmad Shah, on the throne of Gujarat.

Mahmud I (*Begda*) (*A.H. 863-977*).—Mahmud Shah Begda was the greatest of all Gujarat sultans, and during his reign the prosperity of the kingdom reached its highest zenith. His coinage was equally rich in variety and workmanship, and his coins, known as Mahmudis, can be presented as the best specimens of calligraphy. His military operations and his skill in civil administration are simply

superb. Like Ahmad I, he founded two towns, namely, Mustafabad and Muhammadabad, and established mints at both places. He twice attacked Raja Mandlik of Girnar, once in A.H. 871 and again in 874. In the second attempt, when the fort of Girnar was besieged, a good deal of resistance was offered by Mandlik, but ultimately, for want of provisions, he had to surrender the fort and embrace Islam. Mahmud built a city on the site and called it Mustafabad.

Raval Jaysingh of Champaner attacked and killed one of Mahmud's generals, and Mahmud went in person to punish the raja for his impudence. After a protracted siege for a year or so the raja performed johar and sallied forth for a free fight. He was captured; but, unlike Raja Mandlik, he refused to embrace Islam, and paid the penalty by suffering death. This Champaner was given a new name, Muhammadabad, and both names occur side by side as the full title of the mint town on the coins issued from this place.

Muzaffar II (*A.H. 917-932*).—Mahmud's son, Khalil Khan, succeeded him and adopted the title of Muzaffar II. He was pious, learned, and merciful, and was styled Muzaffar the Clement. He lacked the sternness required for a ruler of those times, and the result was that he was involved in repeated disturbances in Malwa and had to fight for the greater period of his reign with the Ranas of Chitor and Idar. In his old age he grew more and more religious and often offered his life for the welfare of his people.

Sikandar (*A.H. 932*).—Muzaffar's eldest son, Sikandar, succeeded his father, but he incurred the displeasure of old ministers by bestowing favours on his inexperienced young friends. In his attempt to dispose of Imad-ul-mulk, one of the trusted followers of his father, he was forestalled by the other party and, prematurely murdered.

Mahmud Shah II (*A.H. 932-933*).—Imad-ul-mulk proclaimed Sikandar's brother, Nasir Khan, a child of six years, as sultan, with the title Mahmud Shah II. The other nobles could not tolerate this high-handedness of Imad-ul-mulk, and they invited Bahadur Khan, the second son of Muzaffar II, who was on his way to Jaunpur, to claim and fight for the throne. He readily agreed, proceeded to the capital, got rid of Imad-ul-mulk, as also Mahmud II, and ascended the throne in the year A.H. 932.

Bahadur Shah (*A.H. 933-943*).—The whole period of Bahadur's reign was one of continuous warfare. True to his name, he, like a brave (Bahadur) soldier, led expeditions against the kings of Khandesh, Berar, Malwa, and Chitor, and, even before he had settled terms with the Rana of Chitor, the Mughal Emperor Humayun, whom he had offended by not surrendering Muhammad Zaman Mirza, the grandson of a daughter of the Emperor Babar, marched against him and inflicted several crushing defeats on him. He fled to Mandu, Champaner, and Cambay one after the other, being hotly pursued by the conqueror. Ultimately he had

to seek shelter from the Portuguese at Div. At this juncture Humayun had to return hurriedly as Sher Shah, the Governor of Bengal, had revolted. Bahadur again gathered his forces and completely routed the army left by Humayun and regained his lost possessions. But Bahadur was destined for disturbances and he had to march against the Portuguese who, instead of building a factory, as permitted by Bahadur in consideration of the shelter given to him, constructed a fort at Div. Bahadur was invited by the Portuguese governor for a compromise, and was treacherously murdered while returning.

Muhammad III.—Muhammad Farukhi of Khandesh, son of Bahadur's sister, was invited to the throne; but, knowing the fate of his maternal uncle, he passed his time in prayer and fasting, and succeeded in courting death after a month or so.

Mahmud III (A.H. 943-961).—Mahmud III, Bahadur's nephew, son of his brother, Latif Khan, was thereafter placed on the throne by the nobles at the tender age of eleven. Naturally, he was a king only in name, while Darya Khan, one of his ministers, was all-powerful. In course of time Mahmud became restless, and, being unable to submit to the restraint, desired to throw off his yoke. Darya Khan thereupon placed another boy on the throne with the title of Muzaffar III, and caused coins to be struck in his name. Mahmud, however, was successful in maintaining his hold as he was popular with his subjects. He, however, could not agree with Darya Khan's life of pleasure and sensuality and fled to Dhandhuka on being invited by Alam Khan Lodi with the promise of making him independent of Darya Khan. Darya Khan's followers also deserted him and he was captured and confined in the fort of Surat.

Burhan, a boy of mean origin, attracted the attention of Mahmud, who appointed him against the wishes of his nobles as a Shoe-Bearer. He gathered strength, and in course of time aspired to the throne. With this end in view he one night offered Mahmud a cup of poisoned sharbat and stabbed him with a dagger. The next day he got all the nobles slaughtered at the hands of a few of the army of Baghmars, or tiger-slayers. He sat on the throne, and, dressed in royal garments, started in procession through the city. Shirwan Khan, one of the surviving nobles, knew of this; and having met him on the way, with one blow cut him into two.

Ahmad III (A.H. 961-968).—Etimad Khan, one of the Amirs who was in charge of the harem, and who had secured the confidence of the late sultan, was consulted as to the possibility of a prince being born in the near future. He replied in the negative, but advised the nobles about a distant relative living at Ahmedabad. The boy was immediately sent for and placed on the throne, with the title of Ahmad Shah III. Other nobles, headed by Ikhtiyar-ul-mulk, tried to put forward Shahu as claimant to the throne, but they were defeated near Mahmudabad and forced to disperse. Internal dissensions hastened the downfall of the Sultanat. Mubarak Shah of Khandesh, who invaded Gujarat, was bribed with the surrender of Sultanpur and Nandarbar. Some other nobles called in the Portuguese for help in

retaining Surat and agreed to part with Daman and Sanjan. Ahmad got disgusted with Etimad Khan and yearned for independence, but the latter was too quick; and the sultan's dead body was found one morning on the sands of the Sabarmati.

Muzaffar III (A.H. 968-980).—Etimad Khan, the Kingmaker, was again approached by the nobles, and he produced a child named Nathu or Habib and represented on oath that he was the child of Sultan Mahmud. The boy of twelve was thus accepted as king, with the title of Muzaffar III. Signs of the downfall of the Sultanat were too evident, and Muzaffar's reign of about twelve years was the period in which several powerful nobles and neighbours were fighting among themselves to carve out appropriate and convenient portions of territory for themselves. Etimad Khan ultimately invited the Mughal Emperor Akbar to invade and annex Gujarat to his dominions. Sultan Muzaffar was secured and made a prisoner. Coins were ordered to be struck and the Khutba to be read in the name of Akbar Padshah. During succeeding years Akbar had to return now and again to crush new aspirants to the Gujarat throne which was far off from the Mughal capital at Agra.

Muzaffar was taken by Akbar with him to Agra and was given Sarangpur and Ujjain in jagir. His movements, however, created suspicion, and he was imprisoned by his father-in-law, Munim Khan Khanan. In 991 he managed to escape and come to Gujarat. He was tempted by some disaffected nobles to try once more for the throne. The idea appealed to him, and, gathering an army, he marched to Ahmedabad, and, with the help of local nobles, he succeeded, and again sat on the throne after eleven years and issued coins in his name from the Ahmadabad mint. When the emperor knew of this, he sent Rahim Khan as the new viceroy with instructions to drive out Muzaffar and take possession of Gujarat. Muzaffar offered strong resistance, but was defeated and forced to fly to Mahmudabad and thence to Cambay. He was treacherously surrendered to the Mughal viceroy by King Bharmal I of Cutch. Muzaffar was too shrewd to remain a captive in the hands of the Mughal viceroy, and at the earliest opportunity he killed himself by cutting his throat with a razor. Uneasy lies the head that wears a crown !

COINAGE AND COIN TYPES.

A study of human psychology reveals that one is loath to welcome sudden alterations in the matter of favourite articles of daily use. He is all the more careful in recognizing a currency which he is not used to or familiar with. That is perhaps the reason why even the bravest and most furious conquerors or the most powerful monarchs could not affect an abrupt change in the currency of the land which they could, by virtue of their sword or otherwise, acquire in the twinkling of an eye. The political conquest has therefore been no indication of an innovation or triumph in the numismatic field.

The history of numismatics has, on this account, been a natural criterion of the degree of recognition or popularity of a ruler not only with the financers and bankers, but with the ordinary masses. The rulers were therefore bound to design their issues on the lines of the current coinage and effect the necessary changes in type, shape, and size bit by bit so that the evolution of coinage is as if it were a gradual and natural sequence of the passage of time and familiarity of the ruling race.

From this point of view, if we examine the coinage from the earliest times, we would be able to find an almost unbroken link between our times and the remotest past so far as numismatics is concerned.

The coinage of Gujarat was accordingly an adaptation of issues from the coinage of the Tughlaqs, whose power was supreme in Gujarat, and whose coinage was recognized throughout the land before Zafar Khan declared his independence of the imperial authority and sat on the throne of Gujarat as the founder of the glorious Gujarat sultanant with the title of Muzaffar I. Then, during the rule of his successors also, we find a marked and gradual shifting from one type of coin to the other in accordance with the circumstances and needs from time to time.

(*Muzaffar I, A.H. 810-813*).—Let us at the outset examine the coinage of Muzaffar I and see how far it was akin to those of his predecessors. Unfortunately, as no gold or silver coins of this ruler are hitherto known, we are at a loss to say anything about them. His copper coins resemble in shape and size the copper issues of Mahmud Shah II Tughlaq. They have the name of the sultan on the reverse, and his title Shams-ud-duniya wa-ud-din on the obverse. Out of the two known copper ones one has the date A.H. 813 clear enough on the obverse. While the descriptive portion of the coins in this catalogue was already printed, my friend, Pandit R. L. Antani of Udaipur, showed me a coin of this ruler that he recently secured. It bears the date 810—the very first year of his reign.

Ahmad I (*A.H. 813-846*).—His gold coins have not been noticed so far, and in silver also only five* pedigree coins are known, one of which is in the Prince of

* (*i*) No. 307 of Thomas, with date A.H. 828 in figures.
(*ii*) No. 3 in this catalogue, with date 835 ; N.S. XXVI, 1915, Taylor.
(*iii*) Cabinet of B.B.R.A.S.; date is illegible; N.S. VI., 1905, Taylor.
(*iv*) American N.S. of New York; date 830 or 840.
(*v*) British Museum, London; date 844 ; N. Ch. (5th Series), volume IV, page 103.

Wales's Museum Cabinet (No. 3). They are dated A.H. 828, 830, 835, and 844, and weigh from 166 to 173 grains. The legend seems to have been copied from the gold and silver coins of Mahmud II Tughlaq. They have on the obverse the legend As-sultan al-a'zam Nasir-ud-duniya wad-din Abul-Fateh and on the reverse the legend in square reads Ahmad Shah bin Muhammad Shah bin Muzaffar Shah Khuld Khilafatahu, giving the names of Ahmad I, Muhammad I, and Muzaffar I; and the date, not in numerals, but in Arabic characters, runs on all the four margins after the fashion of the Delhi sultans.

Copper—

Type No. 1.—Early thick and dumpy coins without mint and date. The earlier copper coins (Nos. 4-29) are similar to those of Muzaffar I, with some additions and alterations. They have thus the name of the Sultan Ahmad on the reverse, and the title Nasir-ud-duniya wad-din on the obverse. Coins numbered 4 to 7 have the quatrefoil and the circle over "he" of Ahmad, while Nos. 8-15 have only the circle on them; No. 8 has on it the letters As-sultan al-a'zam on the obverse in place of the usual epithet Nasir....Nos. 22 and 23 are thin pieces, with some difference in caligraphy; Nos. 28 and 29 have additional letters Abul Fateh on the obverse; Nos. 15 and 21 to 27 are quarter pieces weighing from 35 to 30 grains.

Type No. 2.—Thin pieces, Ahmadnagar mint. The remaining coins, Nos. 30-101 are all of; Ahmadnagar mint. Both the varieties have on the obverse the title Nasir-ud-duniya wad-din with the date in the lower half, but the second variety has the additional words As-sultan al-a'zam towards the top border. There is no difference in the reverse legend of both the varieties, and they bear the name of the Sultan Ahmad Shah in a square, and the name of the mint, Shahr-i-Humayun, Ahmadnagar, running over all the four margins. A large number of coins seems to have been issued from this mint almost every year from A.H. 829 to 846. Coin dated A.H. 834 is not noticed so far; coin No. 74 has a slightly different caligraphy, and Alif of Ahmad is omitted perhaps through an oversight; No. 75 is dated A.H. 827, *i.e.*, two years earlier than the accepted date A.H. 829 for the opening of the Ahmadnagar mint. Whole pieces vary in weight between 148 and 111 grains; half pieces between 73 and 56 grains; and quarter pieces between 30 and 42 grains.

Muhammad II (A.H. 846-855).—The coins of Muhammad II can be divided into three main types.

1st Type, Nos. 102-104.—These coins have the legend As-sultan al-a'zam Ghiyasud-duniya wad-din on the obverse, and Abul Muhamid Muhamud Shah as-sultan and date on the reverse. The last of these is a half-size coin weighing 66 grains.

2nd Type, Nos. 105-117.—It is difficult to trace the origin of the real cause of the issue of the rare, beautiful, and extra heavy coins with the legend in the couplet form. *Mirat-i-Sikandari* mentions that Muhammad's father, Ahmad, "had a

poetical bent of mind, and some of his verses in praise of Saint Sayyid Burhan-ud-din are extant." It is not unlikely that the son may have inherited this poetical genius from his father, and his life of pleasure and luxury might have increased his love for poetry. The couplet runs over both sides of the coin and reads thus :

Obverse.—Sikka-i-Sultan Ghiyas-ud-din Muhammad Shah bad (here comes the date).

Reverse.—Tabadaruzzarb-i-gardun qurs-i-meher-o-mah bad.

The couplet may be translated as follows :—

May the coin of Sultan Muhammad Shah, the Aid of the Faith, remain

So long as in the mint of heaven the discs of the sun and the moon remain.

These couplet coins are broader in size, measuring, on an average, ·9 inches and heavier in weight weighing from, 195 to 220 grains.

3rd Type Nos. 118-127.—These coins are more or less of the same type, though there is some difference in the arrangement of the legend :

Obverse.—Ghiyas-ud-duniya waud-din.

Reverse.—Muhammad Shah As-sultan and date.

The first four have As-sultan inscribed above and Muhammad Shah below while in the rest the order is reversed.

Ahmad II (A.H. 855-863).—A unique silver pedigree coin similar to those issued by Ahmad I is acquired for the British Museum. Unfortunately, the date is not quite legible, though some traces can, on minute examination, be seen on the coin. The legend on it can be read as follows :

Obverse.—As-sultan al-a'zam Qutb-ud-duniya waud-din Abul-Muzaffar—traces of date.

Reverse.—Ahmad Shah bin Muhammad Shah bin Ahmad Shah bin Muhammad Shah bin Muzaffar Shah Khuld Khilafatahu.

It weighs 174 grains and is one inch in diameter.

2nd Type, Nos. 128-143.—The second type is the one commonly met with in copper. It has the legend Qutb-ud-duniya wad-din Abul Muzaffar on the obverse, and Ahmad Shah As-sultan and date on the reverse. Over and above the three ordinary denominations three heavier pieces of 216, 209, and 186 grains, similar to the couplet pieces of the previous ruler, are also known.

3rd Type, Nos. 144-149.—For the first time in Ahmad II's rule billon coins were minted for Gujarat. These have close affinity with similar coins of Alam Shah (A.H. 849-855) and Bahlol Lodi (A.H. 855-894) ruling at Delhi. The reason of his

adopting this title is given by Mr. A. Master in *Numismatic Supplement* No. XL, page 7. He writes, "His laqab Qutb has an obvious connection with Qutb-ul-aqtab, the holy Bukhara Sayyid, the patron of Vajih-ul-mulk. The history of Qutb-ud-din shows that, until his quarrel with Shah Alam, which ended in his death, the sultan was much under the influence of the Bukhara Sayyids. He was the first to adopt the title of Amir-ul-mumnin and Abul-Muzaffar, both of which Altamsh used." The legend reads as follows:

Obverse.—Qutb-ud-duniya waud-din Ahmad Shah As-sultan.

Reverse.—Al-Khalifa Amir-ul-mominin Khuldat Khilafat and date.

Coins Nos. 150 to 152 are very similar to those of the 2nd, type and differ from them inasmuch as the words Abul-Muzaffar are absent on the obverse.

Mahmud I (*A.H. 863-917*)—The only known gold coin of Mahmud I dated A.H. 914, weighing 183·6 grains and measuring ·85 inch, is in the British Museum. The legend on the obverse reads:

Al-wa-siq batāeed-ur-Rahman.

Nasir-ud-duniya waud-din Abul-Fateh.

On the reverse there is the name of the Sultan Mahmud Shah bin Muhammad Shah As-sultan in double square and the date 914 in the bottom margin.

Silver.—

A full size (9·″) pedigree coin weighing 172 grains is in the collection of the Bombay Branch of the Royal Asiatic Society. The date is not clear, but appears to be either 864 or 869. Dr. Taylor's reading of the date as 865 is not correct as 5 in the form of a circle is not to be seen on coins of this period. The lower portion of the unit figure is lost and the circle that is left seems to be the upper portion either of 4 or 9.

The legend on the obverse reads :

Al-wa-siq billa al-minnan Nasir-ud-duniya wa-ud-din Abul-Fateh

and on the reverse there is the genealogy of Mahmud right up to the founder of the dynasty. It reads : Mahmud Shah ibn Muhammad Shah ibn Ahmad Shah ibn Muhammad Shah ibn Muzaffar Shah as-sultan. The date is at the lower bottom.

Ordinary Silver Coins.—

From the time of this sultan the currency is more or less standardized, and the same pattern is continued right up to the end, with few minor differences in weight, size, and the arrangement of the legend, etc.

Mahmud's silver coins were issued in large numbers from the Mustafabad (Junagadh) and Muhammadabad (Champaner) mints. Some issues of the latter mint

bear the mint name Shahr-i-mukarram, Muhammadabad, while others have the name Muhammadabad as well as Champaner inscribed on them. There are four coins of the Dib mint three of which are dated A.H. 900.

All these coins have, more or less, the same legend : Nasir-ud-duniya wa-ud-din Abul-Fateh, the date on the obverse, the name of the sultan in the square, and the mint name in the margins on the reverse. There is a number of minor variations in the position of the date and mint, and the arrangement, etc., of the legend which are all detailed in the body of the catalogue, and which need not be narrated here over again.

Mahmud's copper and billon coins, also of the same type, were issued in large numbers, and about 160 have been exhibited in the Museum cabinet. They are all from the same two mints—Mustafabad and Muhammadabad.

Some interesting peculiarities must be mentioned here. Coin No. 258 has on it the additional names of the sultan's brother, Qutb Shah, and his father Muhammad.

No. 269, acquired from Sir Currimbhoy Ebrahim's collection, has on it clearly the date A.H. 862 as against the date A.H. 863 given by all historians as the date of the accession of Mahmud.

No. 303 from Mustafabad, with date 871 (A.D. 1466), clearly proves that coins were minted at the end of his first expedition against the Raja of Junagadh.

Billon coins (Nos. 321-324a) have the dates in Arabic characters running on the margins of the reverse in place of the mint.

The letters "fi" meaning "at" are to be noticed for the first time on coins Nos. 342-349.

Coin No. 408 is the only specimen issued from the Muhammadabad mint. It is abnormal, both in design and weight. It is modelled after the silver variety (No. 244), and weighs 318 grains.

The top margin of No. 409 bears the letters Khittah, which is usually associated with the mint name Dib.

On coin No. 410, over the name of the sultan and his father, there is the mint name at the top of which the initial letter or letters are not legible, and which can therefore be read either as Ahmadabad or Muhammadabad.

Muzaffar II (A.H. 917-932).—

Gold.—

Out of five gold coins of Muzaffar II known so far four are in the British Museum London, and one is in the Indian Museum, Calcutta. Two of them are dated A.H. 920 while the remaining three are dated A.H. 924, 929, and 932 respectively. The weight

varies from 176 to 179 grains, and the size from ·75 to ·8 inches. The legend, except for slight variations in the arrangement of the words, is the same on all these coins, and reads as follows :

Obverse.—Al-mueed bataeed ur-Rehman Shams-ud-duniya wa-ud-din Abun-nasr.

Reverse.—Muzaffar Shah bin Mahmud Shah As-sultan and date at the bottom.

Silver.—

The legend on the silver coins is the same as that on the gold ones, but very few of them bear mint names. Two coins in the Phayre Provincial Museum, Rangoon, are issues of the Muhammadabad mint, and are dated A.H. 921 and 923.

Nos. 440-443 are coins on which the mint name was incorrectly read as Khanpur. The name has now been correctly read Fi Burhanpur by Mr. C. R. Singhal.

No. 446, which is a beautiful specimen issued from the Mustafabad mint, has on it the additional phrase Khaldullah Mulkahu to be seen for the first time on the coins of this period.

Copper.—

The copper coin No. 470 dated A.H. 918 has also the phrase Khaldullah Mulkahu. It follows therefore that this was adopted by him soon after his occupying the throne.

From coins Nos. 490a-492a we gather that copper coins were also issued from the Burhanpur mint.

Mahmud II (A.H. 932).—

Mahmud was on the throne for only four months when his brother, Bahadur got rid of him by poisoning him. There are four coins—Nos. 513-516—of Gujarat fabric which bear the name of Nasir Shah as sultan on the reverse and can therefore be safely assigned to this Mahmud II, whose name, while he was a prince, was Nasir Khan. Unfortunately, none of these coins is dated.

Bahadur Shah (A.H. 932-943).—

Silver.—

Bahadur Shah had also the privilege of issuing a pedigree coin dated A.H. 933. The weight and size are 129 grains and ·8 inches respectively. The legend starts with the title Qutb-ud-duniya waud-din Abul-Fazal and ends with the name of Bahadur Shah bin Muzaffar Shah. The rest of the legend on the reverse takes the genealogy right up to Muzaffar I. Few ordinary silver coins that are known are dated A.H. 941 and 943. One with the date 943 is in the British Museum and has on it the additional letters " Al-adal " along with " As-sultan."

Copper.—

Bahadur's copper coins Nos. 526-531 make a type by themselves wherein the legend on the reverse is nothing but the date written in Arabic characters. The

letter Sanah is in the centre and the top portion reads Asantin, Salas, or Arba't, as well as Salsin (in crude form), and the bottom reads Tusumayt and the date 932 to 934 in figures as the case may be.

Shah-i-Hind Type.—

Dr. Taylor, in his article in *Numismatic Supplement* No. XXXIII, had, for lack of any better hypothesis, assigned these coins to Babar and Humayun. Eight years after this Professor S. H. Hodivala tackled this problem more successfully, and he suggested, in *Numismatic Supplement* No. XL, that these coins should more appropriately be assigned to Bahadur Shah of Gujarat. This was further strengthened when he discovered the traces of the mint Shahr-i-mukrram, Muhammadabad (Champaner), on the margins of some of them.

These coins bear the followng couplet as the legend running all over the obverse and reverse :

Harkera ru-yo riwaji hast bar sathe zamin
Sikka-i-Iqbal-i-Shah-i-Hind darad bar jabin

This can be translated as.—

Whoever possesses name and fame on the surface of the earth bears on his forehead the stamp of the glory of the sovereign of India.

They were issued, it seems, only for six years from A.H. 935 to 940. Dr. Taylor refers to a coin dated 934, but it is not forthcoming. These six or seven years of Bahadur were full of stirring events and prosperity. He successfully attacked in succession the Deccan kings, the Ruler of Bidar, the Sultan of Malwa. and the Raja of Ujjain and became virtual master of all the southern countries. He had aspiration, even for the throne of Delhi. It is not improbable that he designed this special type of currency to be introduced in those countries as a mark of his triumph. These coins can be separated into two varieties on the strength of the different arrangements of the legend, etc. On the first variety the reverse legend is inscribed in a square, and the name of the mint runs on the four margins of the coin. In coins of the second variety the square is absent, andthe legend is written in lines one over the other. The mint name is not to be seen on them at all. Coins of this second variety seem to have been issued only during A.H. 938 and 939.

Mahmud Shah III (A.H. 943-961).—

Gold.—

Twelve muhars of this sultan are known so far, and they are all of the same type, weight 185 grains, size ·8″, and bear the same legend, *viz.*

Al-wasiq billah al-minnan Nasir-ud-duniya waud-din Abul-Fateh on the obverse and Mahmud Shah bin Latif Shah As-sultan and date on the reverse.

Dates known, so far, are six in number. They are A.H. 946, 947, 949, 950 956, and 960.

Silver.—

The silver coins also bear, more or less, the same legend on the obverse and reverse, but they can be grouped into five separate lots because of the difference in the arrangement of the legend, the position of the date, and such other points of minor importance.

In Nos. 600-606 (*a*) the legend on the obverse has to be read from the top downwards; (*b*) the legend on the reverse is enclosed in a double square with peaked sides ; and (*c*) the date is over Mahmud.

In the next lot (Nos. 607-612) the legend on the obverse runs from the bottom upwards; and the date is given at the bottom.

In the third lot (Nos. 613-618a) the legend on the reverse is inscribed in a scalloped circle, and the date is over Latif.

Nos. 619-625 have the reverse legend in a double square with peaked sides. In the last lot, Nos. 626-629, the date is over " bin; " and in No. 628 the name Ahmad is legible on the bottom margin, which leads us to infer that these coins might have been minted at Ahmadabad.

Copper—.

Copper coins bear a portion of the same legend, but only a few of them have clear mint names on them. Some striking points are noted below :

(*a*) No. 630 has the mint name Muhammadabad, with its epithet clearly inscribed in the four margins on the obverse;

(*b*) No. 658 dated A.H. 950 has on it the name of the sultan in Devanagari characters. Of the four letters the last two, *viz.*, " Moo " and " Da, " are quite legible;

(*c*) No. 659 has the date A.H. 951 inscribed on both sides,

(*d*) Nos. 665a-679 are positively the issues of the Ahmadabad mint, and the name of the mint, with its epithet Shahr-i-Mu'azzam can be clearly read.

(*e*) No. 696a has the word Khittah on the top margin on the reverse which is associated with the mint name Dib;

(*f*) Nos. 704 and 705 are issues of the Daulatabad-Baroda mint. On the former Daulatabad is quite clear, and traces of the first two letters of Baroda can also be traced, but with difficulty. On the latter the mint name is too fragmentary to be read ; and

(*g*) On Nos. 708 and 709 one of the Malwa mint marks is given on the obverse.

Ahmad III (A.H. 961-968).—

The gold coin of Ahmad III was not known till 1925-26 when the Provincial Museum, Lucknow, acquired a beautiful half-muhar weighing 91·5 grains,

measuring ·6 inches, and dated A.H. 962. The legend on the coins of all metals is practically the same ; it is seen in full on the silver coin and in fragmentary condition on the gold and copper coins. The full legend reads :

Al motasim billah Ur-rahman Ghiyas-ud-duniya wa-ud-din Abul-Mahamid

on the obverse and the reverse gives the name of the Sultan Ahmad Shah, with his father's name, Mahmud Shah, and the date.

The following peculiarities have, however, to be noted :

(*a*) On No. 732a the word " bin " can be read, but the name of the sultan's father, Mahmud, is missing.

(*b*) Nos. 786-794 are issues of the Ahmadabad mint as can be ascertained by fragmentary traces of the name and epithet of the mint.

Muzaffar III (*A.H. 968-980 and A.H. 991-992*).

Gold.—

Only two coins dated A.H. 970 and 977 are known. They are similar to the coins of Muzaffar II, and the legend is also the same on the obverse. On the reverse the names of the sultan and his father, as well as the dates, are given in a double square.

Silver.—

On the silver coins the legend is the same as on the gold ones, differing only in arrangement, etc. The following special features may be noted :

(*a*) The reverse legend on coins Nos. 797-798 is in a square, while it is in a scalloped circle in coins Nos. 799-803 ;

(*b*) On coins Nos. 804-816 the reverse legend is inscribed in a peaked area, and the name of the father of the sultan is omitted ; and

(*c*) Coin No. 817 dated A.H. 991 is interesting inasmuch as it has on the obverse the Kalima, as is found on the coins of Akbar. On the reverse the date 991 and the mint Ahmadabad can be read over and above the usual names of the sultan and his father.

Copper.—

On the copper coins also the legend is the same, though in fragmentary form. Most of them are of the Ahmadabad mint, as can be gathered from fragments of the mint name or its epithet in the margins.

(*a*) In coin No. 840 there is a Malwa mint mark on the reverse.

(*b*) In coins Nos. 847a-853 we find the couplet, though in a crude form, which is noticed on the reverse of the coins of Muhammad II.

(*c*) On the reverse of No. 859 the mint name Champaner can be read.

(*d*) The obverse side legend on coins Nos. 865 and 889 is the same as is found on the coins of Ahmad III.

MINT TOWNS.

Till recently, only four mint towns of the Gujarat Sultanat were known to numismatists. One more, *viz.*, Khanpur, was tentatively read by Mr. H. N. Wright on a coin sent to him by Dr. Taylor. With the help of several other specimens of the same mint this Khanpur has now been positively read as Burhanpur. Two new mints have come to light as a result of our examination of the coins in this museum. They are Dib and Daulatabad.

1. *Ahmedabad :* احمد آباد, founded A.H.= 813 or 815 or 816
A.D. 1410 or 1412 or 1413

Epithets : a. شهر معظم Shahr-i-Mu'azzam, the great city.

b. دارالضرب Dar-al-Zarb, the seat of the mint.

(*a*) No silver coin with the mint name Ahmadabad was known so far, though Professor Hodivala has described one with the epithet Shahr-i-Mu'azzam. But the bottom margin of the silver coin in catalogue No. 628 bears Ahmadabad as the name of the mint.

In copper only three coins of Muzaffar III were brought to light, but in our cabinet there are ten dated coins of Mahmud III and four of Ahmad III having this epithet clearly on them.

(*b*) There are one silver and two copper coins in the museum collection which bear the second epithet of this mint, *i.e.*, Dar-al-Zarb. These coins were struck during the second reign of Muzaffar III.

On the top of the reverse of copper coin No. 410 of Mahmud I, dated H (9) 10 'احمد آباد' can be clearly read. Whether this coin was also struck at Ahmadabad or at Muhammadabad is a debatable point.

2. *Ahmednagar* (*now Himmatnagar, in Idar State*) احمد نگر founded H 829 or 830=A.D. 1425 or 1426.

Epithet : شهر همایون Shahr-i-Humayun, the auspicious city.

The epithet of this mint, which was doubtfully read by Dr. Taylor as شهر مهانور, the city of great light, was correctly deciphered by Mr. H. N. Wright as شهر همایون the auspicious city. In this collection there are several coins on which the word 'همایون' can be read with certainty.

This mint was uttering copper coins from the year of its founding (H 829, to the year of Sultan Ahmad's death in H 846 except, the year H 834. Coin No. 75 of this mint is dated as early as H 827; it is not known whether this date is a freak, or that the city was founded, and the mint established, earlier than H 829.

It appears that this mint was uttering only coppers, and was exclusively used by Sultan Ahmad. The coins of none of the other sultans nor of any other metal are known to have been struck at this mint.

3. *Mustafabad* (*Girnar or Junagadh*) مصطفےٰ باد, founded H 877=A.D. 1472.

Epithet : شہر اعظم Shahr-i-A'zam, the great city.

Dr. Taylor had noticed only three silver issues of this mint of Mahmud I, but in this collection there are twenty-six silver and five billon coins with dates of Mahmud I and two silver coins of Muzaffar II, out of which one is dated H 926. This shows that the mint was functioning till H 926.

In copper the number of coins is fairly large, and they bear dates from H 871 to 912, with few gaps here and there. Coin No. 303 dated 871 marks the first attack against Girnar, though the fort was finally captured in the year H 877. With the exception of this solitary piece which is dated A 871, the rest of the coins bear dates after the year H 877.

4. (*a*) *Muhammad abad* محمد آباد founded H 889=A.D. 1484.

(*b*) *Muhammadabad* alias *Champaner* محمدآباد عرف چانپانیر.

Epithet : شہر مکرم Shahr-i-Mukkaram, the illustrious city.

(*a*) Just as the Ahmadnagar mint was meant only for copper issues, this mint was active mostly with white metal. Dr. Taylor had about thirteen silver coin of this mint, but he had not secured a single copper piece. He therefore believed that the coins were struck there by none except Mahmud I and that too durings the period between H 895 and 904; and that the whole period during which the mint was working does not cover more than twenty-five years. A glance at the *Index of Mints* will, however, show that the coins were struck at this mint not only by Mahmud I, but also by his successors, Muzaffar II, Bahadur Shah, and Mahmud III. The dates found on them are from H 891 to 912, H 921 and 923, H 935 to 940, and H 944 respectively. Copper coins, though their number is very limited, were struck by all the sultans mentioned above, except Muzaffar II. Copper coin No. 410 dated 910 of Mahmud I which bears 'محمدآباد' on the reverse top margin might have probably been issued from this mint.

(*b*) The city's remarkable prosperity can be realised from coins issued from it which bear the mint name محمدآباد عرف چانپانیر. The number of these coins is extremely limited, and in this collection there are only five silvers which belong to Mahmud I. In the legend on the reverse of copper coin No. 859 dated H 977 of Muzaffar III " Zarb Champaner " can be read.

5. *Dib :* خطۂ دیب

All the four coins of this mint—three of silver and one of copper—have been found in Dr. Taylor's collection. Coin No. 254 is figured in his article as No. 32 on plate III, but the mint name seems to have escaped his notice. The date on all the three silver coins is A.H. 900, while on the copper one the date is missing.

6. Burhanpur : برهانپور

The mint name on these coins was read by Dr. Taylor as ضربت خانپور, Zarbat Khanpur, but, on more careful examination, it appears that it is فی برهانپور, *i.e.*, at Burhanpur.

Four silver, and about the same number of copper, coins issued from the Burhanpur mint by Muzaffar II have come to light. It appears, the mint must have been working for a limited time as the dates found on coins are from H 920 to 923 and 926.

It is inexplicable, so far, why only five coins of Mahmud I issued from this mint in the year A.H. 900 have been obtained, even though Dib was all along in the possession of the Gujarat sultans ever since Zafar Khan secured it in A.H. 804 till the time it was taken over by the Portuguese in A.H. 943 after the death of Bahadur Shah. The existence of one copper of Mahmud III confirms the statement in the *Imperial Gazetteer*, volume XI, page 364, that the after the death of Bahadur Shah Mahmud III twice made attempts to recapture Dib from the Portuguese, but without success. This coin, however, can make us believe that Mahmud III ought to have been successful at least once and held Dib for some time which enabled him to issue coins in his own name from this mint.

On two copper coins of Mahmud I and Mahmud III the legend in the top and left margins respectively can be read as Khittah, which is the attribute preceding Dib, though the actual name of the mint is missing.

7. Daulatabad.

In the margin of a solitary copper coin of Mahmud III Daulatabad can be read, though with some doubt. In *Mirat-Ahmadi* it is found that Baroda was also called Daulatabad. This dateless piece might have been struck at Baroda by one of the governors of Sultan Mahmud III.

WEIGHTS AND STANDARDS.

The metrology of the coins issued by the sultans of Gujarat has hitherto been a tough problem to be solved by the numismatists. In spite of a large number of pecimens being available, the variety of weights is too copious to yield a decisive conclusion in the matter. As early as A.D. 1902 Dr. Taylor contributed a chapter on the weights and measures of these coins and summarised the results of his investigations in two tables showing the various denominations that could be ascertained. Taking a unit of 4 ratis, or 7·4 grains, he postulated ten denominations in silver and ten in copper. *According to him, a "rati" weighed 1·85 grains, and 96 such ratis went for a tola; this made a tola equivalent to 177·6 grains.

In 1908, when Mr. H. N. Wright submitted his contribution in volume II of the *Indian Museum Catalogue*, he held that a rati weighed 1·8 grains only, and 100 such ratis made a tola; this brought a tola to 180 grains. About the denominations he is silent, and evidently agreed with the decision arrived at by Dr. Taylor.

The latest on the subject is a scholarly article from the pen of Professor S. H. Hodivala which appeared in volume II (New Series) of the *Journal of the Bombay Branch of the Royal Asiatic Society* in 1926. In this article he discussed the matter at great length, but could not arrive at any definite conclusions in spite of the very rich collection of coins that he had in his possession. The very copiousness of details, he observed, creates confusion and embarrassment, more so because there is the absence of any literary evidence on the subject, and because the coins themselves, having suffered in weight, due to constant use, cannot give the correct or exact weights for guidance. All the same, he added two fresh denominations in the silver, and six more in the copper,† issues of this series. As regards the difference of opinion in respect of the number of ratis contained in a tola, he thought it hazardous to decide, especially when the difference between the two theories of a tola came only to 2·4 grains; and it became still less in case of halves and quarters.

When we examine these theories in the light of the material at our disposal, it appears that Dr. Taylor was correct in accepting the 96 rati standard for a tola; and it appears that Mr. H. N. Wright also has since revised his theory of 100 ratis (*vide* his joint article in the *Numismatic Supplement*, No. XXXVIII, "On the Metrology of the Early Sultans of Delhi," published in 1924). As has been pointed out, the Gujarat sultans followed closely the style of their contemporaries at Delhi so far as the size, type, and general tone of the legends were concerned. There is no wonder if they had the same standard of weight—*viz.*, that of 96 ratis to a tola—as had their contemporaries at Delhi. A survey of the weights of the copper issues of Ahmad I,

* The denominations are 5, 10, 15, 20; 6, 12, 24; and 8, 16, 32 units in silver; and 4, 8; 5, 10, 20, 30, 45; and 6, 12, 24 units in copper.

† The denominations added are: 2½ and 18 units in silver; and 2½, 15, 18, 22, 27, & 36 units in copper.

II, and III, Mahmud I, Bahadur, and Muzaffar III, which are accepted to be of 80 ratis in weight, makes it clear (from their weight of 145 to 147 grains in respect of full, and 73 to 74 grains in case of half, coins) that Dr. Taylor's observation was correct.

As regards the silver coins issued by Muzaffar II, Dr. Taylor held that they had an issue weight of 60 ratis (*i.e.*, $60 \times 1 \cdot 85 = 111$ grains), while Mr. Wright was of opinion that the maximum weight of the then rupee was 64 ratis (*i.e.*, $64 \times 1 \cdot 8 = 115 \cdot 2$ grains). As Professor Hodivala did not come across any coin of Muzaffar II or those of his son Bahadur weighing more than 111 grains, naturally he sided with Dr. Taylor. In the cabinet of the Prince of Wales' Museum, however, there is a coin of Muzaffar II dated 929 (No. 468) which weights 115 grains. This evidence goes in favour of Mr. Wright's conclusion.

Denominations.

Dr. Taylor had classified the known silver and copper coins in twenty (ten in silver and ten in copper) different denominations. Professor Hodivala has, on the strength of his own collection, added two more subdivisions in silver and six others in copper, making in all 28 denominations. These denominations ought to be a certain multiple of a common unit which, on a careful examination of coins available, was ascertained by Dr. Taylor to be of 7·4 grains, or 4 ratis. It does not seem feasible for so many denominations to have been quite independent of each other; and, as a result of careful classification, we have been able to group them in several series, as shown below. Evidently there were two, three, or more series current in every ruler's time, and they consisted of a full, half, quarter, and eighth of a coin. In some cases, coins with half as much again the value and weight of a full coin also seem to have been issued :—

	A		B
	Units. Grains.		*Units. Grains.*
Whole pieces	20=144–148	Whole pieces	24=177·6–180
Halves..	10=72–74	Halves..	12=88·8–90
Quarters	5=36–37	Quarters	6=44·4–45
$\frac{1}{8}$ Pieces	$2\frac{1}{2}$=18–18·5		
	C		D
	Unite. Grains.		*Units. Grains.*
Whole pieces	30=222–225	Whole pieces	32=236–237
Halves..	15=115–115·2	Halves..	16=118–118·5
Quarters	$7\frac{1}{2}$=55·5–57·6	Quarters	8=57·6–59·2
		$\frac{1}{8}$ Pieces	4=28·8–29·6
	E		F
	Units. Grains.		*Units. Grains.*
Whole pieces	36=259·2–266·4	Whole pieces	45=324–333
Halves..	18×133·2–135	Halves	22=158·4–162·8

The last two series, E and F, seem to be $1\frac{1}{2}$ pieces and their halves of B and C series respectively. This leaves only a 27-unit piece in copper which cannot be grouped in any of the above series.

LEGENDS.

If we go through the mintages of the previous rulers of India, we find that it was a practice with all those monarchs to strike coins with different types and legends, and the sultans of Gujarat were no exception. If we scrutinise the list of legends, it can be seen that each sultan was striking coins with different types of legends; and the coins of Mahmud I have about twenty different varieties of legends. These legends narrate the name, the title, the faith of the ruling Sultan, and even the mint where the coins were struck. The legend on the gold and silver coins is much more elaborately designed than on the copper issues, and the full legend was stamped only on coins of the two precious metals, while on coppers the legend was only fragmentary.

The following are the different legends found on the coins of each sultan :—

1. *Muzaffar I.*

   Obverse شمس الدنيا والدين

   Reverse مظفر شاه السلطان

2. *Ahmad I.*

   (*a*) Obverse السلطان الاعظم ناصر الدنيا والدين ابوالفتح

Muzaffar Shah III.

State Museum,
LUCKNOW.

SOME OPINIONS.

Prof. S. H. Hodivala, M.A.—*The compilation of such a Corpus is a task which requires great industry, accuracy and minute attention to details and I see that Mr. Singhal has performed it in a thoroughly satisfactory and workmanlike manner. The Introduction as well as the Chapter on Mints, Coin Legends and Bibliography have been carefully written and the plates are also very good.*

R. B. Whitehead, I.C.S. (*Retd.*), **F.A.S.B., Cambridge, England.**—*It is very full, interesting, and a fine piece of work.*

H. Nelson Wright, I.C.S. (*Retd.*), **London.**—*The Gujarat catalogue is a notable contribution to Indian Numismatics and it has been well got up and edited.*

Spink & Son's Numismatic Circular, April 1936.—*The present catalogue is the most complete and comprehensive study of the coinage of the Sultans of Gujarat yet published.*

The collotype Plates illustrate all the principal types and are most useful.

We do not hesitate in recommending the book to all students of Indian Numismatics, who owe a debt of gratitude to the Curator of the Bombay Prince of Wales Museum, and Mr. C. R. Singhal for their most valuable contributions to our knowledge of an hitherto little known series of coins.
